

# Greening your Cleaning with GSF USA's *Écologique* Program

GSF USA's *Écologique* cleaning program relies on Green-Seal certified processes to create safer, more sustainable environments for our customers.

## 5 The five branches of the program are:

Sustainable cleaning chemicals

High-tech equipment

Environmentally sourced consumables

Documented training and procedures

GSF University leadership development

### Sustainable cleaning chemicals help maintain healthier spaces:

**5x**

Indoor air can be up to five times more polluted than outdoor air.<sup>1</sup>

**3**

GSF USA relies on electrochemically-activated solutions (ECAS) created using three safe ingredients: water, salt and electricity.<sup>2</sup>

**99.999%**

ECAS for cleaning and disinfecting kill or inactivate 99.999% of pathogens without the VOCs, fragrances, fumes and residues commonly associated with conventional cleaning chemicals.<sup>2</sup>

### High-tech equipment enhances cleaning performance and productivity while reducing chemical, water and energy consumption:

**90-95%**

The percentage of dry soil that can be removed from carpet by vacuuming.<sup>3</sup>

**3 hours**

Our robotic vacuums handle dirt removal and can operate autonomously for up to 3 hours, cleaning nearly 50,000 square feet per week.<sup>4</sup>

**70%**

Our ec-H2O™ floor care equipment electrolyzes tap water into a safe cleaning solution, and uses up to 70% less water and reduces wastewater.<sup>5</sup>

**1 million square feet**

We clean 1 million square feet with robotic autoscrubbers each month.

### Environmentally sourced consumables limit the volume of waste generated in facilities:

**95%**

With an unlimited supply of ECAS generated on site, facilities reduce disposable chemical packaging by 95%.<sup>2</sup>

**25-60%**

High-quality toilet paper should be made up of a minimum of 25-60% post-consumer material.

**1 time**

We use microfiber cleaning cloths, which are a more sustainable alternative compared to disinfectant wipes, which can only be used once.

### Documented training and procedures and GSF University leadership development enable our team to expand their cleaning expertise:

**24 hours**

Every GSF USA employee completes a minimum of 24 hours of training.

**200%**

Turnover in the cleaning industry can be as high as 200% but our employee tenure is longer than average, thereby improving the quality of work and customer relationships.<sup>6</sup>
